i took my stardelta motor for rewinding,when it came back the terminals were not labelled.Please help me to identify the U1 V1 W1 AND W2 U2 V2 using multimeter. Thanks Dancan. Reply. lemau says 17/01/2012 at 4:47 PM. Dear Dancan, Use your multimeter and select continuity to checked pair or motor terminal.If buzzer beep that mean it the pair for the winding connection. U1 = U2 V1 = V2 W1 = W2 ...

Developing a Wiring Diagram The same basic procedure is used to develop a wiring diagram from the schematic as was followed in the previous chapters. The components needed to construct this circuit are shown in Figure 29 – 10. In this example, assume that two contactors and a separate three-phase overload relay are to be used. The...
