I think the real 'cost' of this injury isn't if he can play or not next season. It's how much can he work on his throwing power and chemistry with receivers this offseason. That's the real cost. While I was happy overall with his play this year, he definately has things he needs to improve on and he'd be the 1st to tell us that.

Background Metal-organic frameworks (MOFs) are made by linking inorganic and organic units by strong bonds (reticular synthesis). The flexibility with which the constituents' geometry, size, and functionality can be varied has led to more than 20,000 different MOFs being reported and studied within the past decade. The organic units are ditopic or polytopic organic carboxylates (and ...
