She states she has not had lab work done in over a year, but the last time she did was at a health fair; she was told her fasting glucose was 119 mg/dl. On exam, you note that the patient is 62 inches tall and weighs 243 pounds. Her vital signs are within normal limits except for her blood pressure, which is 138/84 mm Hg. You find that she has white discharge in the vaginal canal; there is ...
