This book was filled with about 25 anecdotes flimsily tied together by Gawande's less than inspiring reflections. I have the book in front of me at the moment and I am paging through rereading sections that I noted along the way: "I had come into residency to learn how to be a surgeon. I had thought that meant simply learning the repertoire of move and techniques involved in doing an operation ...

Thus, surgeons have adapted a variety of methods to streamline parathyroidectomy and reduce the risk of complications, collectively termed minimally invasive parathyroidectomy (MIP). All MIP techniques are designed to limit dissection, hasten recovery, reduce postoperative discomfort, and reduce incision length. These techniques typically require preoperative imaging and other adjuncts.
