Particularly if it's suitable for boat building. The place is at Windsor NSW....Gravel The following is from the trendtimers website: Australian Blackwood (Acacia melanoxylon [Leguminosae]) Australian Blackwood has high crushing strength and resistance to impact. Australian Blackwood has good bending properties.

Australian timber used for boat building

Most moderate weight boat-building timbers would be better suited, and unless your leaving it outside, high durability isn't so important. Meranti (from your local hardware) would work quite well for thwarts or stringers, as would Douglas Fir, or Fijian Mahogany or New Guinea Rosewood which is available through various specialist timber suppliers - Celery Top Pine would be perfect, if you can get it.

Australian boat building timbers - WoodenBoat
