A pal of mine was VP-Engineering for a major manufacturer of automotive wiring connectors and some years ago, they had extra mfg. capacity in their EU plants and were bugging the NAM division to flog the parts to North American automotive OEMs. The problem was that NONE of the European connectors could pass the North American durability standards - particularly for water ingress and corrosion ...

[USA Location information - USA.com](#)

The 1st gen has a reputation for engine problems on various Toyota forums. The 2nd gen supposedly fixed these issues, but these are cars that lead hard lives. People seem to treat FWD sport compacts like disposable cars. I doubt there will be many old TC's around 30+ years from now, just like there are very few 80's vintage Celicas around today.

[eHow | eHow](#)

If your Toyota is a front wheel drive, or all wheel drive vehicle the clunking noise when you're turning right may be your CV joint on that side. A bad CV joint can also cause vibrations at cruising speeds. Our recommendation would be to have the clunking noise when turning fixed first and see if that fixes all of the problems you are having. It is possible your pilot bearing is bad as well ...
